

General Meeting—Wednesday, January 25, 2012—1:00 pm
Abravanel Hall
Refreshments will be served.

UNDERWATER ROBOTICS

Presentation by David Copenhaver

David will talk to us about his current undertakings in the world of underwater robotics. Through photos, videos, and stories, David will show how these computer-controlled robots are used today in underwater exploration, underwater recovery, and even underwater farming.

Please come enjoy this fascinating speaker.

*Life is not about waiting
for the storms to pass...
it's about learning to
dance in the rain!"*

David Copenhaver holds a Baccalaureate degree in Telecommunications from Indiana University and a Masters of Science in Electronic Commerce at National University. He also is a graduate of the National Entrepreneurship Academy.

During the past 20 years David has worked for a variety of small, fast-paced entrepreneurial companies as well as large communication companies including; Ameritech and Lucent Technologies, to develop strategic business plans to implement innovative strategies using disruptive technologies to solve communication problems.

As an entrepreneur, David has owned and operated several successful multimedia and electronic commerce consulting businesses including; Spectrum Productions, One Minute Messenger, 4ISR, AC3 and Security Impact. Through these businesses he has developed many creative technologies to solve business problems throughout the world.
